

CS 3430 Database

Homework 6

**You need to use tables created in homework 3 and 4.*

Based on tables created in homework 3 and data inserted in homework 4. Construct queries to complete the following tasks.

STUDENT

Name	Student_number	Class	Major
Smith	17	1	CS
Brown	8	2	CS

COURSE

Course_name	Course_number	Credit_hours	Department
Intro to Computer Science	CS1310	4	CS
Data Structures	CS3320	4	CS
Discrete Mathematics	MATH2410	3	MATH
Database	CS3380	3	CS

SECTION

Section_identifier	Course_number	Semester	Year	Instructor
85	MATH2410	Fall	07	King
92	CS1310	Fall	07	Anderson
102	CS3320	Spring	08	Knuth
112	MATH2410	Fall	08	Chang
119	CS1310	Fall	08	Anderson
135	CS3380	Fall	08	Stone

GRADE_REPORT

Student_number	Section_identifier	Grade
17	112	B
17	119	C
8	85	A
8	92	A
8	102	B
8	135	A

PREREQUISITE

Course_number	Prerequisite_number
CS3380	CS3320
CS3380	MATH2410
CS3320	CS1310

** Please keep the new student Johnson and add records of Smith back to your database before doing the following homework.*

1. Retrieve the names of all CS students.
2. Retrieve the number of sections provided in each semester.
3. For each section taught by Professor Anderson, retrieve the course name, course number, semester, year, and the number of students who took that section.
4. Retrieve the transcript of Smith. A transcript includes the course name, course number, credit hours, semester, year, and grade for each course.
5. Retrieve students (show Student_number) who already took both sections 102 and 135.
6. Retrieve the names of all students who can register for CS3380 next semester.
(Assuming that students who have completed at least one prerequisite course, regardless of grade, and have no grades for the given course, are eligible to register for the given course.)

Take screenshots for each question (with the query statement and result on the same screen) and submit all screenshots in a single PDF document.
